PRODUCT INFOMATION

product parameters:
Product name: Mountain aroma diffuser
Product net weight: 546g
Rated voltage: DC 24V
Ultrasonic frequency: 2.4MHZ
Application area: 10-30m²
Executive standard: GB4706.1-2005

Prouduct Size: 17.9*17.9*19.3cm
Power Supply: Standard Special Adapter
Output power: 12W
Water tank capacity: about 600mL
Main material: ABS/PP/PC/electronic components
Place of Origin: Shenzhen, China

Frequency: 2.4M

Noise: <36dB

Double protection for water shortage:
Spring detects water: Sensitivity <1s
No water protection:
Water shortage protection shutdown,
Buzzer B-B sound, turn off the machine automatically
(including spray, indicator light, atmosphere light)

Timing & Indicator
Number of light: 4 pcs
Light color: Green
60min : Indicator is on means timing 60±1min
180min: Indicator is on means timing 180±2min
360min: Indicator is on means timing 360±3min
ON : Indicator is on means long-time working

Power ON:
When power on the machine,buzzer B sounds and then machine change into standby mode.

Button:
Number of buttons: 2
Operation mode: click
MIST button:
1. Power on and click to turn on, the buzzer will sound "B", and the atomizer will
   start to work (the default is small fog), the default timing is 60min; the corres-ponding indicator
   light is on, and when the timing is up, machine will turn off (including spray, ambient light,
   indicator)while the buzzer does not sound;
2. Click the button again, buzzer will sound "B ", and switch 180min timing, the corresponding
   indicator light will light up, the timing time is up, machine turns off (spray, ambient light, indicator light)
   while the buzzer does not sound;
3. Click the button again, buzzer will sound "B ", and switch 360min timing, the corresponding in-
   dicator light will light up, the timing time is up, machine turns off (spray, ambient light, indicator light)
   while the buzzer does not sound;
4. Click the button again, buzzer will sound "B ", and switch the long-time working status, and the cor-
   responding indicator will light up;

PRODUCT INFOMATION

"LIGHT button (colorful)":
1. Click the button, the buzzer does not sound, the light enters the gradual mode, the gradual
sequence is: white-red-purple-blue-cyan-green-yellow, the sequence is different each time,
no memory function.
2. Click the button again to fix the current color, and the buzzer does not sound;
3. Click the button again to switch the color sequence: dark blue--bright blue--dark green--bright
green--dark red--bright red--dark purple--bright purple--dark yellow--bright yellow--dark blue--bright
green--dark white--bright white, the buzzer does not sound every when you click;
4. Click the button again, the ambient light will turn off, and the buzzer B-B will sound;
5. When the ambient light is turned on, press and hold the button for 2s to turn off the light
and the buzzer B-B will sound;
6. In the shutdown state, when the ambient light is off, long press is invalid

Remote Control:
ON/OFF
Shutdown state, click the button, buzzer sounds "B", enter 60MIN state, default small fog,
non-intermittent mode, timed out, turn off spray, ambient light, indicator light, buzzer does not sound;
Power on, click to turn off (spray, ambient light), buzzer will sound " B-B ";

Intermitntent:
When the machine is working again, click to enter the intermittent mode, buzzer sounds"B", the
corresponding indicator flashes at a frequency of 0.5s, the atomizer works for 10s, stops for 10s,
cyclically, without memory function, does not affect the timing time;
Continuous:
When the machine is in the interminttent mode, one click will enter the continuous spray mode, the
buzzer will sound "B ", it does not affect the timing time, and has no memory function.
Timing:
In the power-on state, click the button to enter 180min mode, click again to enter 360min mode;
click again to enter ON mode; click again to enter 60min mode;
Big/Small:
In the power-on state, the default is small fog, click the button, buzzer sounds "B", and enter the big
fog mode; click the button again, the buzzer sounds"B-B", and enter the small fog mode;
Light:
Power on or off, click the button, the buzzer sounds "B", the ambient light enters the gradual mode,
the gradual sequence: white--red--purple--blue--cyan--green--yellow, each cycle sequence is
different, and no memory function
Click the button again to fix the current color and buzzer sounds "B";
Click the button again to switch the color sequence: dark blue--bright blue--dark green--bright
green--dark red--bright red--dark purple--bright purple--dark yellow--bright yellow--dark blue--bright
blue--dark white--bright white , The buzzer does not sound every time you click;
Click the button again, the ambient light turns off and buzzer sounds.
